

## **Clark Forklift**

Clark Forklift Forklift Training - Performing globally, there are currently 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those operating in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive models of lift trucks, with parts covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Supplier is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark features a phenomenal Parts Distribution team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most amazing dealer support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the materials handling industry.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional commitment to safety is currently a customary feature on every lift truck.

Clark's continual mission to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the world to be certified with the internationally accepted quality standard ISO 9001 for every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any environmental restrictions, thus placing them in a dominant market position.

### **Resource Efficient Production**

Clark has selected the very economical and beneficial system of "Lean Production" for its assembly facilities and use of resources. This structure was developed to acknowledge the most effective method of manufacturing facility management and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

### **Engine Design**

Clark's product engineers and suppliers communicate together to perfect the effectiveness and excellence of their products while minimizing costs. The new value engineering agenda combines modern product development and provides improved client support and service within the industry.
