Aerial Lift Train the Trainer Cambridge

Aerial Lift Train the Trainer Cambridge - The train the trainer program for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial surroundings. Trainers would be provided with in-depth instruction on the workings of aerial lift machines. The program is provided on an open enrollment basis and delivered at select training locations. Before the certification, trainers are evaluated and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider in the business, we offer top notch hands-on training. We give lots of chances to practice the techniques and concepts which are taught inside the classroom. Together with hands-on experience, trainers develop general understanding of instructional techniques and machinery theory, classroom and field communication skills, and ability to efficiently train and evaluate operators. Trainers would gain knowledge of what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional methods included in communicating concepts inside a classroom and/or field situation. Knowledge requires a training component to be efficient in workplace situations. There are three factors of equipment operation which the trainer must learn how to convey to operators: what to perform; how to do it; and the reason why it must be done.

The program provides detailed, up-to-date reference material to be able to help trainers convey the subject matter to machine operators. Guidebooks contain detailed information about all aspects of industrial mobile machine operator training. Included in the package are training aids which provide a visual reference in order to improve the learning experience. The equipment-specific training products contain essential materials for both the trainer and the operator: videos/DVD's, overhead transparencies, safety message posters, equipment models; digital training aids and stability pyramid.
