

Bucket Truck Training Cambridge

Bucket Truck Training Cambridge - The Vehicle-Mounted Aerial Work Platform or likewise called bucket truck training program is designed to lessen the risk of incident and personal injury while working in close proximity or with bucket trucks by efficiently training operators who are qualified. An aerial lift device refers to any vehicle-mounted device, telescoping or articulating, or both, which is made use of to position personnel to reach places that will otherwise be not accessible. Aerial lift devices are made use of to elevate workers to above-ground work locations.

The goal of the program is to provide operators with the skills, knowledge, training materials and abilities needed to learn to operate vehicle-mounted aerial work platforms safely and effectively.

The program comprises a classroom training session and a hands-on training session. To become certified, participants should be successful in both parts. A full-size certificate and a wallet-size certificate will be given upon completion of the program.

The kinds of lifts examined in the program comprise Aerial lift devices are usually made of metal, wood, reinforced plastic, fiberglass or other materials.

Definitions

Articulating boom platform: multiple hinged boom sections.

Extensible boom platform: has a telescopic or extensible boom.

Platform: the part of an aerial device which is designed to carry personnel.
